Starter

A complete 5-section business website — not just a single page

One-time payment

₹13,300

₹7,999

Save ₹5,301 · ~40% off

This is a fully custom 5-section website, built around your business — not a single landing page with everything crammed onto it. Every section below is its own properly designed part of the site, and every way a customer can reach you is connected from day one.

WHAT'S INCLUDED

- ✓ **Home**
First impression page — who you are, what you do, why customers should choose you.
- ✓ **About**
Your story, your team, your credibility — the page that builds trust before a customer calls.
- ✓ **Services**
A clear breakdown of everything you offer, laid out so customers know exactly what to ask for.
- ✓ **Testimonials**
Social proof from your real customers, displayed to build confidence with new visitors.
- ✓ **Contact — WhatsApp, Call & Mail**
All three ways to reach you, connected and working from the moment the site goes live. No missed enquiries because a customer couldn't find how to contact you.
- ✓ **Free hosting** (fair usage capped)
Your site goes live at no extra hosting cost, within a standard fair-usage limit suited to a business getting started.
- ✓ **Social media integration**
Direct links to your social pages, connected right from launch.

BEST FOR

Businesses that need a professional, trustworthy presence online right now — shops, service providers, and professionals who want to be found and contacted easily.

One-time payment

₹25,000

₹14,999

Save ₹10,001 • ~40% off

Growth is for businesses that have outgrown a simple brochure site. You get everything in Starter, plus a Blog page to publish updates, and — most importantly — a CMS dashboard that puts you in control of your own website.

EVERYTHING IN STARTER, PLUS

- ✓ **Blog**
Publish updates, offers, and announcements directly — keeps your site active and helps with search visibility.
- ✓ **CMS Dashboard — edit content & theme yourself**
Change text, images, and basic appearance whenever you need to, without calling us or paying for small edits.
- ✓ **Contact / Inquiry form**
A structured enquiry form that lands directly in your inbox, in addition to WhatsApp, Call & Mail.
- ✓ **Google reviews — pulled in automatically**
Your real Google reviews show up on your site automatically, no manual copy-pasting needed.

BEST FOR

Growing businesses that update their site often, want to publish content regularly, and don't want to depend on a developer for routine changes.
